Trusted Security Solutions – New Name – Seasoned Experience

(For immediate release)

Trusted Security Solutions, Inc. may be a new name in the financial transaction security market, but the company founders bring a wealth of experience, expertise and a proven record of innovation to focus on the development of practical and affordable solutions to the financial transaction processing industry. Dennis G. Abraham, president of Trusted Security Solutions, Inc. has over 15 years experience in the retail financial transaction processing industry with an emphasis on Personal Identification Number (PIN) based systems. Mr. Abraham is the past chairman of ASC Working Group X9A3 that developed the X9.8 PIN Management Standard and the X9.24 Retail Key Management Standard. He is also the co-founder and president of Abraham & Associates, Inc., a consulting firm specializing in cryptography.

Steve Walker, Don Woodward, and Jim Saunders complete the Trusted Security Solutions management team and together have over 40 years of systems development experience in database design, application programming, telephony, and cryptographic processing. They are all principals in J.S. Walker & Company, Inc., a 10-year old software development and consulting firm specializing in the financial industry.

Trusted Security Solutions, Inc. is offering a simple and affordable solution to the Visa[®] requirement of a unique key per ATM. The “A98 Initial ATM Key Establishment System” implements a total solution to this problem. It is designed for institutions that manage the cryptographic keys for ATMs. The A98[™] system, which requires no change to the ATM, includes patent pending-technology for establishing initial ATM keys in a manner that is compliant with all applicable industry standards and network operating rules.

Future product plans include a Key Injection System and a PIN Issuance System.
